

# The Eyes of Texas are Upon OB/GYNs: Physician Migration and Crowdsourced Enforcement of Abortion Regulations

Martin Andersen<sup>1</sup> and **Kaden Grace**<sup>2</sup>

<sup>1</sup>Dept. of Economics, University of North Carolina - Greensboro

<sup>2</sup>Dept. of Economics, University of Tennessee - Knoxville

Brownbag

April 2026

# What is a Civil Liability Enforcement Mechanism (CLEM)?

- Private citizens enforce through civil lawsuits; “bounty laws”
- Arms race on sensitive issues: **abortion in TX**, guns in CA, more:

[CLEM Copycats](#)

## Case Study: Texas Senate Bill 8, “Heartbeat Bill”

- Took effect in 2021, **during** *Roe v. Wade* era:
- Bans abortion after detection of fetal heartbeat (6 weeks)
- CLEM: Sue for minimum \$10,000 in damages against any who “aid or abet” an abortion (no fee recovery for defendant)
- Very high salience

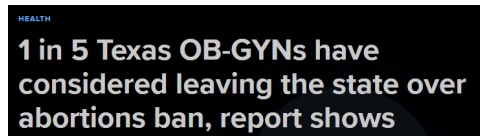

[Timeline of TX Abortion Law](#)[SB-8 Lawsuits](#)[SB-8 is Salient](#)

# Motivation: Becker (1968) Expected Costs

|                        | Probability of Detection                                                                                  | Penalty if Detected                                                                                                                                                           |
|------------------------|-----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Criminal liability     | State must identify, investigate, & prosecute a perpetrator                                               | Financial exposure bounded by statute, not covered by malpractice insurance                                                                                                   |
| Civil liability (SB-8) | <b>Broadened:</b> "aid or abet" exposes any physician near routine patient contact; burden of proof lower | <b>Effectively unbounded:</b> no fee recovery even for prevailing defendants; single event can generate multiple suits (\$10,000+ each), not covered by malpractice insurance |

Expected cost = Prob(detection)  $\times$  Penalty. SB-8 raises *both* components for a *broader set of physicians*.

Motivation: People are saying...

But: cost to change state of practice is  $\approx$ \$150k to \$250k

So what do the data say?

# Does the Enforcement Mechanism Matter?

**Research Question: What is the effect of novel civil liability enforcement in the context of physician migration responses to abortion regulations?**

- Identifying variation: location, Dr. specialty, time (triple-difference model)
  - Texas vs. all other states
  - Reproductive health physicians (RHPs) vs. all other MDs/DOs
  - After SB-8 (May 19, 2021) vs. before

# Data

- **Two complementary data sources:**
  - *Migration (quantity)*: Quarterly NPI panel, Nov. 2007 – Jun. 2022 ( $N \approx 1.4\text{m}$  physicians)
  - *Wages*: Wagescape job postings with salary, 2016–2022 ( $N \approx 1.3\text{m}$  postings)

# What we find

- **Migration:** No significant migration response
  - Consistent across active counts, entries, and exits
  - Migration costs  $\approx$ \$150k–\$250k could explain the null
- **Posted salaries & job postings:** No significant effect on posted salary or volume of job postings
- Null is consistent across DDD (and FE's), SDiD, and SC

# We already know: Criminal penalties decrease OB/GYN quantity

- TRAP (Targeted Regulation of Abortion Providers) era, 1993–2022: **Timeline**
  - 6.6% fewer OB/GYNs in high-TRAP states [Chatterji \(Health Economics, 2008\)](#)
  - 5.3% decrease in OB/GYNs over 28 years [Markowski & Vandenbroeck \(WP, 2026\)](#)
- Post-*Dobbs* era, 2022–present:
  - 35% loss of OB/GYNs in Idaho [Rader \(WP, 2024\)](#)
  - 4.2% decline in OB/GYNs in ban states [Zhu et al. \(WP, 2024\)](#)
  - 3% decrease in OB/GYNs in ban states [Diaz-Campo & Pineda-Torres \(WP, 2026\)](#)

**Contribution:** How does *civil* liability enforcement compare? Wage effects?

# Data Sources

## NPI Panel (migration)

[Summary Stats](#)

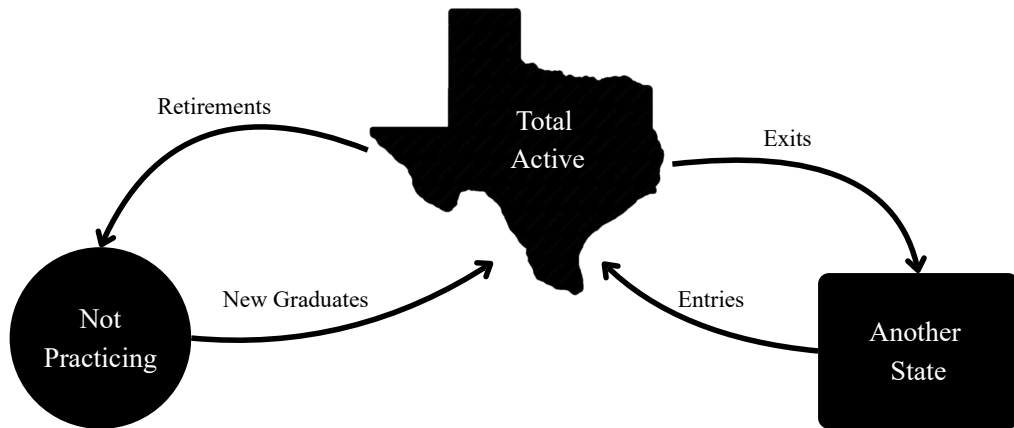

- CMS NPES + DAC: universe of U.S. physicians
- Practice address updated within 30 days of move (but no enforcement)
- Nov. 2007 – Jun. 2022;  $N \approx 1.4\text{m}$  physicians

## Wagescape (wages)

[Summary Stats](#)

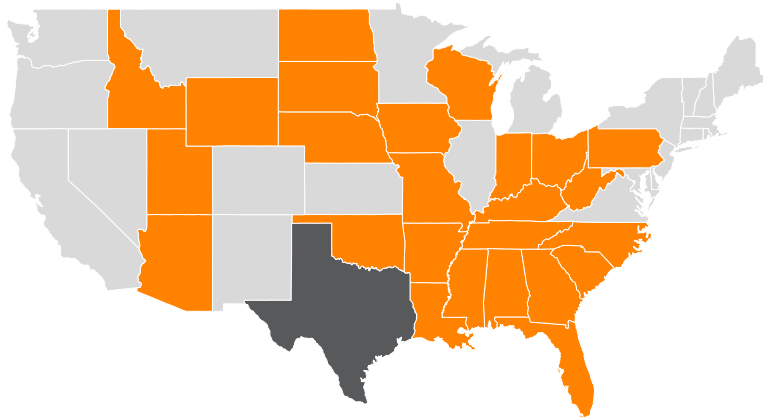

- Online job postings 2016–2022
- $N \approx 1.3\text{m}$  MD/DO postings;
- all OB/GYN + OB-doing Family Medicine + all ER (title-based)
- Separate by urban/rural, full-time/part-time (“locum tenens”)
- Salary disclosed in 65–80% of postings, adjust by COL [Figure](#)

# Outcome Variables - Migration

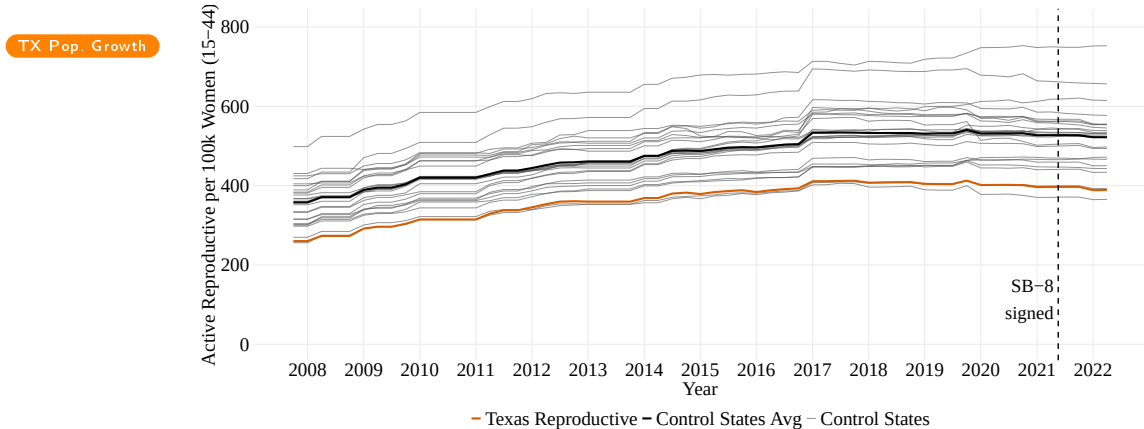

## Control States (Hostile to/Banning Abortion)

## Balance Table

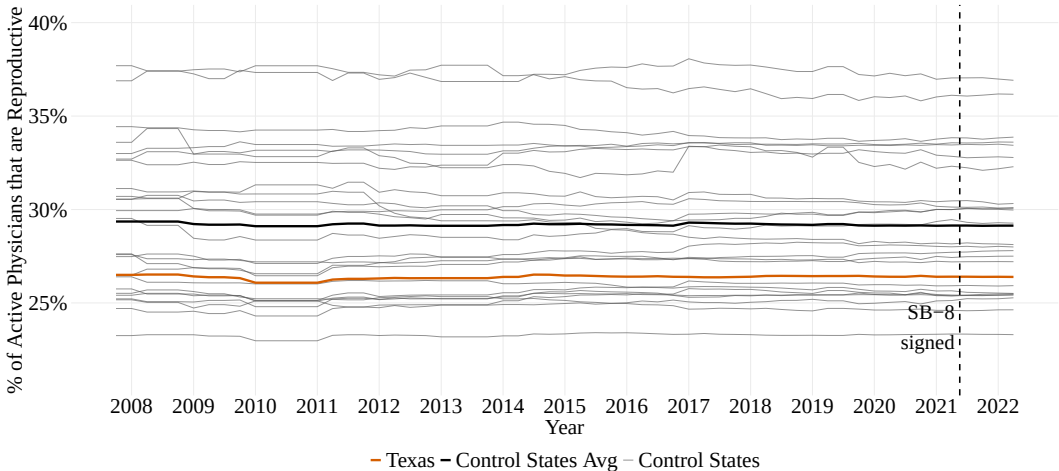

■ Texas (Treated) ■ Restricted Control States (n=25) ■ Other States

# Trend: Reproductive Providers outside vs. inside Texas

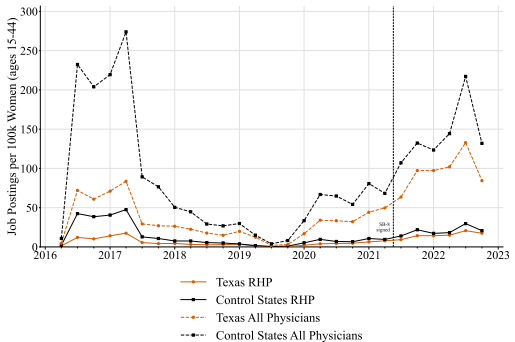

# Percentage of Active Physicians: Reproductive Providers

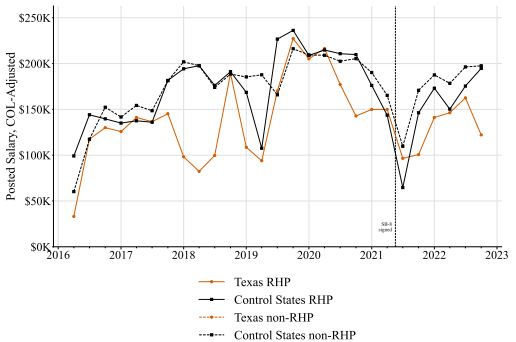

# Wagescape: Job Postings & Salaries

## Job Postings per 100k Women

## Posted Salary

# Triple Diff: Time, State, & Specialty

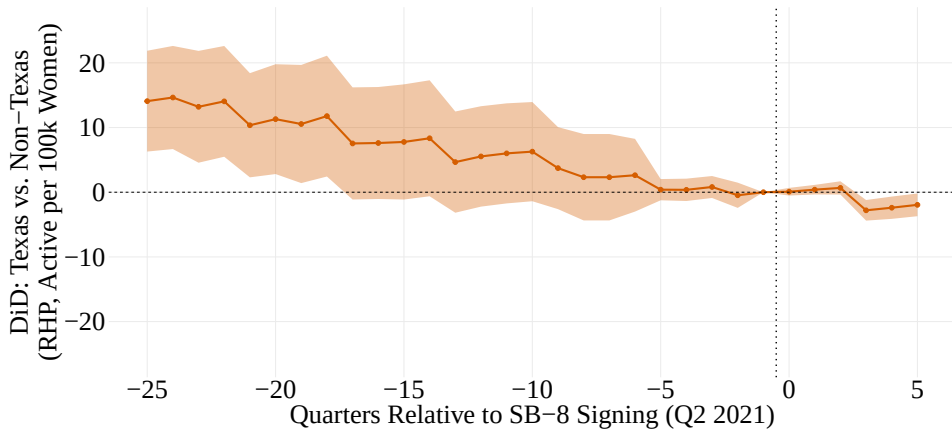

**Identifying assumption:** Had Texas not passed SB-8, RHPs in Texas would behave similarly to RHPs in other states before and after May 19, 2021

$$\begin{aligned} \text{Outcome}_{ist} = & \alpha + \beta_1 \cdot \underbrace{\text{Post SB-8}_t}_{\substack{=1 \text{ if after} \\ \text{May 19, 2021}}} \times \underbrace{\text{Texas}_s}_{\substack{=1 \\ \text{if Texas}}} \times \underbrace{\text{RHP}_i}_{\substack{=1 \\ \text{if Reprod.} \\ \text{Health Phys.}}} + \bar{\beta} \cdot [\text{Post SB-8}_t + \text{Texas}_s + \text{RHP}_i \\ & + \text{Post SB-8}_t \times \text{Texas}_s + \text{Post SB-8}_t \times \text{RHP}_i + \text{Texas}_s \times \text{RHP}_i] + \underbrace{u_{ist}}_{\substack{\text{error} \\ \text{term}}} \end{aligned}$$

where  $\text{Outcome}_{ist} \in$

# SDID: On Diff b/w Treat/Control — Migration

# SDID: On Diff b/w Treat/Control — Wage

## Current limitations:

- Job postings with salary are a noisy signal of wage, but not actually wages

## Next Steps:

- Merge migration with new Medicaid prescribing data
  - Intensive margin: do Dr's change their services rendered?
  - Retirement margin: easier to "retire early" than move states
- Inflow margin: new physicians deciding *where to start* bear no relocation cost
  - Merge migration with physician age: do younger Dr's behave differently?
- Extend migration analysis to county-level
  - Blue vs. red counties; border counties (lower move cost)

- The federal constitution guarantees a right, but a state passes a policy infringing on that constitutional right
- Someone sues the state, specifically the enforcer of the offending policy
- A judge decides if the state policy infringes on the constitutional right
- But, what if there's no gov't enforcer of the offending policy...?
- *Brown vs. ...* Who?

CLEM is “‘Not only unusual, but unprecedented... it is the role of the Supreme Court in our constitutional system that is at stake.” (SCOTUS Chief Justice John Roberts)
